SUMMARY

AI Engineer with full-time experience at Atyuttama Enterprises LLP, focused on Python, retrieval-augmented generation (RAG), and NLP. Built citation-grounded LLM applications and vector-search pipelines with FastAPI, pgvector, and ChromaDB. Developed JurisGPT, accepted for IEEE publication, achieving 87% citation accuracy and reducing hallucination by 79%. Completed 1,000+ LLM evaluation and RLHF tasks at Outlier AI, assessing model correctness, groundedness, and code quality.

EXPERIENCE

Atyuttama Enterprises LLP — AI Engineer

Aug 2025 – Sep 2026

Full-time | Hyderabad, Telangana, India (Hybrid)

- Developed conversational AI workflows, including agent prompts, intent handling, fallback responses, and human handoff.
- Built retrieval-augmented generation (RAG) workflows to ground voice agent responses in business documents and website content.
- Integrated AI agents with APIs and business tools for appointment scheduling, lead capture, and call follow-up.

Outlier AI — Freelance AI/ML Engineer (LLM Evaluation & RLHF)

Aug 2024 – Aug 2025

- Completed 1,000+ LLM evaluation and RLHF tasks for frontier-model training pipelines — assessing and improving model outputs across code generation, reasoning, and prompt optimization, specializing in Python and backend engineering domains.
- Maintained a consistent 4–5 star quality rating across diverse AI and software engineering projects, demonstrating reliable judgment on model correctness, groundedness, and code quality at scale.

TECHNICAL SKILLS

Programming: Python, SQL, TypeScript, JavaScript

LLM Systems: RAG pipelines, LangChain, vector databases (pgvector, ChromaDB), embeddings, OpenAI/Claude APIs, agentic workflows, LLM evaluation & RLHF

ML & Computer Vision: PyTorch, Scikit-learn, OpenCV, YOLOv8, ByteTrack, MediaPipe, Pandas, NumPy

Backend & Infrastructure: FastAPI, RESTful APIs, Node.js, PostgreSQL, SQLite, Docker, AWS, Supabase, Pytest, Git/GitHub

Languages: English, Hindi, Malayalam, Tamil

RESEARCH PUBLICATION

[JurisGPT](#): A Retrieval-Augmented Generation Based Legal Assistant for Indian Startups (Accepted, IEEE)

Jan 2026

- Developed JurisGPT, a citation-grounded retrieval-augmented generation (RAG) assistant using 47,867 Indian legal documents and hybrid BM25–lexical retrieval; achieved 84.17% Recall@5 and 0.9531 MRR on a 120-query, human-verified benchmark.
- Evaluated five retrieval configurations and 40 generated answers; found that generic cross-encoder reranking reduced nDCG@5 by 8.7–16.3 points, while JurisGPT achieved 80% citation faithfulness and a 2.5% severe hallucination rate in the answer evaluation.

PROJECTS

Chatseeker — AI Chat Analysis Platform | [Link](#)

Jan 2026 – Present

Python, FastAPI, PostgreSQL (pgvector), Claude API

- Architected a multi-stage AI pipeline ingesting chat exports from 6 platforms (WhatsApp, Telegram, Instagram, Facebook, CSV, JSON) into a self-designed Universal Chat JSON schema, performing emotion classification, language detection, and automated translation of non-English messages.
- Built citation-grounded semantic search by embedding every message into a pgvector index, powering streaming natural-language Q&A where each answer cites the exact source messages retrieved.
- Delivered a seven-module analytics dashboard covering sentiment timelines with annotated peaks, TF-IDF vocabulary analysis, behavioral metrics (response-time gauges, conversation-initiation patterns), and emoji–sentiment correlation.

CERTIFICATES

OCI Generative AI Professional — Oracle (Oct 2025) | [Link](#)

OCI Data Science Professional — Oracle (Jul 2025) | [Link](#)

EDUCATION

Lovely Professional University, Punjab, India — B.Tech, CSE; CGPA: 6.93

Aug 2022 – May 2026
