SUMMARY

AI Engineer building conversational AI, retrieval-augmented generation (RAG) and full-stack data applications. Hands-on experience with Python, SQL, APIs, hybrid/vector search and LLM evaluation, supported by skills in Power BI, Tableau, Advanced Excel and ETL pipelines. B.Tech CSE graduate specializing in **Data Science and Machine Learning**.

EXPERIENCE

Atyuttama Enterprises LLP - AI Engineer **Aug 2025 - Sep 2026**

Full-time | Hyderabad, India (Hybrid) | Product: HeyRik

- Developed **conversational AI workflows** with agent prompts, intent handling, fallback responses and human handoff.
- Built **RAG voice agents** grounded in business documents and website content for context-aware business support.
- Integrated **API tools** for appointment scheduling, lead capture and call follow-up across business workflows.

Outlier AI - Freelance AI/ML Engineer **Aug 2024 - Aug 2025**

- Completed **1,000+ LLM evaluation and RLHF tasks** assessing Python code, reasoning and response groundedness.
- Maintained **4-5 star quality ratings** across Python, backend engineering and prompt optimization tasks.

Ichase Pvt Ltd - Data Analyst (Remote) **Aug 2024 - July 2025**

- Cleaned and consolidated student enquiry, application and admissions data, checking for duplicates and missing fields to support reliable reporting.
- Prepared dashboards and recurring reports to track lead sources, counsellor follow-ups, application stages and enrolment trends.
- Analysed conversion and drop-off patterns by programme, intake and channel, and shared findings with admissions and marketing teams.

TECHNICAL SKILLS

AI & Machine Learning: RAG, LLM APIs, agent prompting, tool calling, embeddings, BM25/reranking, LLM evaluation, PyTorch, scikit-learn.

Data Analysis: Power BI (DAX, Power Query), Tableau, Advanced Excel, Python (Pandas, NumPy), KPI reporting, hypothesis testing.

Data Engineering: SQL, PostgreSQL/pgvector, ETL, data validation, ingestion pipelines, Celery, Redis, Spark, Dask.

Software & Cloud: FastAPI, REST APIs, TypeScript, Next.js, Docker, Git, Pytest, AWS, GCP.

Expertise: Conversational AI and RAG; API and tool integrations; Hybrid and vector search; ETL and data quality; Data analytics and dashboards; Evaluation and benchmarking.

Languages: English, Hindi, Malayalam, Tamil

RESEARCH PUBLICATION

JurisGPT | Legal RAG and Retrieval Evaluation

Research co-author | SASIGD 2026 | Best Paper Award

Python, FastAPI, Next.js, SQLite FTS5/BM25

- Co-developed legal RAG over **71,050 Indian legal passages** with content-hash deduplication and separate Indian/UAE indexes.
- Combined **BM25 and lexical retrieval** with rank fusion and reranking; added citations, evidence-based refusals and retrieval-only fallbacks.
- Compared **five retrieval configurations** on an **earlier, expanded 204-query internal benchmark** using Recall@5, MRR and nDCG@5.

PROJECTS

Chatseeker | Multilingual Chat Analytics and RAG

Python, *FastAPI*, *PostgreSQL/pgvector*, *Celery*, *Redis*, *OpenAI*, *Claude*

- Built **FastAPI/Celery ingestion pipelines** for five chat-export sources, normalizing messages and tracking parsing, NLP and embedding stages.
- Implemented **pgvector search**, batched embeddings, streaming answers and source citations; delivered multilingual sentiment, emotion and conflict analytics across **seven dashboard modules**.

CERTIFICATES

Oracle OCI Generative AI Professional (Oct 2025) | Verify

Oracle OCI Data Science Professional (Jul 2025) | Verify

EDUCATION

Lovely Professional University, Punjab, India **Aug 2022 - May 2026**

B.Tech - Computer Science and Engineering

Specialization: Data Science and Machine Learning | CGPA: 6.93
